

Ground and Flight Training Resources for Sport Pilot Certificate

This list offers known flight schools and instructors that offer training with light sport category aircraft. Most schools have high-end light sport aircraft (LSA's) that are more similar to general aviation flying than those lighter aircraft we fly at the airpark. We encourage those new to aviation to or those new to flying ultralights and LSA's that operate similarly to ultralights, pursue this level of training to learn the basics of flight. Once you have either completed flight training and/or have solo'ed in these aircraft, we encourage you to perform flight transitioning in our types of aircraft in order to become accustomed to the flight characters of such aircraft (or ultralight vehicles).

The club makes no guarantees or makes any specific recommendation on the school or instructor other than providing a list where such entities offer training in LSA aircraft.

Flight Ventures Aviation Academy

French Valley Airport (F70)
37350 Sky Canyon Dr #311, Murrieta, CA 92563
(833) 484-3759
